

ANDERSON FUEL IS PLEASED TO ANNOUNCE A VALUABLE NEW SERVICE!

- ✓ *Monitors, protects and maintains your oil tank.*
- ✓ *Minimizes unexpected tank leaks*
- ✓ *1 year \$1,500 Warranty Coverage*
- ✓ *Extraordinary value*

The TankSure® Program is designed to eliminate worry by providing a recommended annual preventive maintenance practice. This program helps monitor and protect your oil tank and give you the peace of mind that if a replacement is needed, the warranty will cover up to \$1,500 towards the replacement.

\$1,500 Proactive Tank Replacement Warranty

Your tank's thickness measurements, physical characteristics and surrounding environment will be analyzed with our Tank Profiling Software to determine if your tank needs to be replaced. In the future if you tank needs replacement, the warranty will cover up to \$1,500 towards the replacement.

Ultrasonic Inspection

Our trained service professionals will use state of the art ultrasonic equipment to test your tank. The ultrasonic equipment uses the same fundamentals as a medical ultrasound to measure the thickness of your tank. From these measurements we are able to determine when your tank needs to be replaced.

Scientific Analysis & Monitoring

Your tank's thickness measurements, physical characteristics and surrounding environment will be analyzed with our state of the art Tank Profiling Software. Tank information is analyzed for proactive replacement of individual tanks when they fall below the standard index.

Corrosion Protection Agent

Our corrosion protection agent proactively fights deterioration in your tank extending its lifetime dramatically. The agent works similar to zinc protection used in water heaters and the marine industry.

HOW THE TANKSURE® PROGRAM WORKS

This diagram lays out how we conduct and establish the program to our customers. The initial test and introduction takes only a few minutes, and once completed our technician will analyze the gathered information and monitor your tank for one year. If a leak is on the horizon, we will know about it and act proactively to resolve the issue. We would be happy to go through the program with you at any time, so please call our office with any questions, concerns, or comments.

1. Customer signs up for the TankSure® Program

An initial visual inspection is conducted to ensure qualification

2. Oil Service Technician performs Ultrasonic Tank Test and visual inspection

Technician completes Tank Inspection Form and notes visual corrective actions like Code Upgrades and Ultrasonic Scores

5. Customer is assured safety and security of this expensive equipment, and can have a peace of mind knowing they're protected with this valuable program

3. Data from Ultrasonic readings are entered, analyzed, and monitored using TankSure® Profiling Software 3.0

Your tanks thickness measurements, physical characteristics and surrounding environment will be analyzed with our state-of-the-art TankSure® Profiling Software 3.0. Tank information is analyzed for proactive replacement of individual tanks when they fall below the standard index.

4. Once on the Program if a tank replacement is needed, our warranty will cover up to \$1,500 toward a replacement

Unexpected leaks can be extremely costly not to mention clean up costs and environmental dangers to your home and property
